

# Mitsubishi TDJS35

A direct-drive refrigeration unit with the compressor installed directly on the vehicles engine. It is a simple and extremely reliable design that has become a best-seller. Available in models from 3.5 tons up to heavy trucks.

## Product data

A direct-drive refrigeration unit with the compressor installed directly on the vehicles engine.

It is a simple and extremely reliable design that has become a best-seller.

Available in models from 3.5 tons up to heavy trucks.

## Advantages

High cooling capacity

Reliable in operation

No evaporator in the body

Easy to operate

Low operating costs

## Measurements

Condensor

## Technical specification

Cooling capacity at 0°C	4 237 Watt
Cooling capacity at -20°C	2 253 Watt
Air circulation	1 260 m3
Weight (without electric motor)	78 kg
Weight (with electric motor)	124 kg
Compressor	CS55/90 / SD7L15
Heating capacity	2 640 Watt

## Optional features

- Additional water heater
- Temperature logger
- Electric operation
- Telematics
- Service agreement
