

Mitsubishi TDJS50

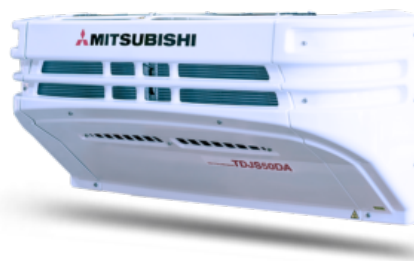

A direct-drive refrigeration unit with the compressor installed directly on the vehicles engine. It is a simple and extremely reliable design that has become a best-seller. Available in models from 3.5 tons up to heavy trucks.

Product data

A direct-drive refrigeration unit with the compressor installed directly on the vehicles engine.

It is a simple and extremely reliable design that has become a best-seller.

Available in models from 3.5 tons up to heavy trucks.

Advantages

High cooling capacity

Reliable in operation

No evaporator in the body

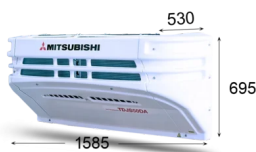

Easy to operate

Low operating costs

Measurements

Condensor

Technical specification

Cooling capacity at 0°C	5 421 Watt
Cooling capacity at -20°C	3 077 Watt
Air circulation	1 800 m3
Weight (without electric motor)	82 kg
Weight (with electric motor)	156 kg
Compressor	CS90 / CS150
Heating capacity	4 230 Watt

Optional features

- Additional water heater
- Temperature logger
- Electric operation
- Telematics
- Service agreement
