

Mitsubishi TE30

A cooling unit with the latest technology to meet the needs of electric vehicles. The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability. It is best suited for vehicles up to 5 tons, but depending on temperature requirements and the design of the van, it may also be […]

Product data

A cooling unit with the latest technology to meet the needs of electric vehicles.

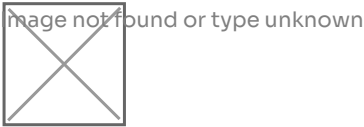

The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability. It is best suited for vehicles up to 5 tons, but depending on temperature requirements and the design of the van, it may also be suitable for vehicles up to 7.5 tons in some cases.

Advantages

-  Low energy consumption
-  Quiet operation
-  High cooling capacity thanks to inverter technology
-  Independent battery allows cooling even when the vehicle is turned off
-  Low maintenance cost

Measurements

Condenser

Technical specification

Model	TE30
Cooling capacity at 0°C	3 019 Watt
Cooling capacity at -20°C	1 170 Watt
Airflow	732 m3/h
Weight Condenser	88 kg
Weight Evaporator	20 kg
