# Mitsubishi TEJ100

A cooling unit with the latest technology to meet the needs of electric vehicles. The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability. It is suitable for heavy trucks and can be powered by a battery, PTO, e-PTO, or its own battery system.

### **Product data**

A cooling unit with the latest technology to meet the needs of electric vehicles.

The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability. It is suitable for heavy trucks and can be powered by a battery, PTO, e-PTO, or its own battery system.

## **Advantages**

Manufactured for electric applications EV, HV

A Hyperinverter (design similar to

Extremely low noise level

Extremely low energy consumption

Excellent cooling and heating

No serviceable parts

#### **Measurements**

Condenser

## **Technical specification**

Model	TEJ100
Cooling capacity at 0 $^{\circ}$	14 000 Watt
Cooling capacity at -20 °C	8 000 Watt
Noise level PIEK	Lower than 60 Db
Weight	260 kg
Airflow	7 000 m3
