Mitsubishi TEJ100 Multi

A cooling unit with the latest technology to meet the needs of electric vehicles. The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability. It is suitable for heavy trucks and can be powered by a battery, PTO, e-PTO, or its own battery system.

Product data

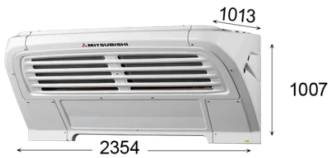

A cooling unit with the latest technology to meet the needs of electric vehicles.
The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability.
It is suitable for heavy trucks and can be powered by a battery, PTO, e-PTO, or its own battery system.

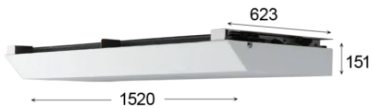

Advantages

- Manufactured for electric applications EV, HV
- Hyperinverter (design similar to a heat pump)
- Extremely low noise level
- Excellent cooling and heating capacity
- Extremely low energy consumption
- No serviceable parts

Measurements

Condenser

Evaporator

Technical specification

Model	TEJ100
Cooling capacity at 0 ℃	14 000 Watt
Cooling capacity at -20 ℃	8 000 Watt
Noise level PIEK	Lower than 60 Db
Weight	260 kg
Airflow	7 000 m3
