

Mitsubishi TEK35

A cooling unit with the latest technology to meet the needs of electric vehicles. The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability. It is best suited for vehicles up to 5 tons, but depending on temperature requirements and the van's design, it may also be suitable for [hellip;]

Product data

A cooling unit with the latest technology to meet the needs of electric vehicles.
The design is based on Mitsubishi's renowned heat pumps with extremely low energy consumption and reliability.
It is best suited for vehicles up to 5 tons, but depending on temperature requirements and the van's design, it may also be suitable for vehicles up to 7.5 tons in some cases.

Advantages

Low energy consumption

Quiet operation

High cooling capacity thanks to inverter technology

Independent battery allows cooling even when the vehicle is turned off

Low maintenance cost

Measurements

Condenser

Evaporator S

Technical specification

Model	TEK series
Cooling capacity at 0 °C	3200 W
Cooling capacity at -20 °C	1600 W
Airflow	1100m3/h
Weight Condenser	91 kg
Weight Evaporator	16 kg
Noise level	Lower than 60 Db
