

Mitsubishi TDJS35 Multi

A direct-drive refrigeration unit with the compressor installed directly on the vehicles engine. It is a simple and extremely reliable design that has become a best-seller. Available in models from 3.5 tons up to heavy trucks.

Product data

A direct-drive refrigeration unit with the compressor installed directly on the vehicles engine.

It is a simple and extremely reliable design that has become a best-seller.

Available in models from 3.5 tons up to heavy trucks.

Advantages

High cooling capacity

Reliable in operation

No evaporator in the body

Easy to operate

Low operating costs

Measurements

Technical specification

Cooling capacity at 0°C	4 237 Watt
Cooling capacity at -20°C	2 253 Watt
Air circulation	1 260 m ³
Weight (without electric motor)	78 kg
Weight (with electric motor)	124 kg
Compressor	CS55/90 / SD7L15
Heating capacity	2 640 Watt

Optional features

- Additional water heater
- Temperature logger
- Electric operation
- Telematics
- Service agreement
